Engineering is akin to writing or painting in that it is a creative endeavor that begins in the mind's eye and proceeds into new frontiers of thought and action, where it does not so much find as make new things. Just as the poet starts with a blank sheet of paper and the artist with a blank canvas, so the engineer today begins with a blank computer screen. Until the outlines of a design are set down, however tentatively, there can be no appeal to science or to critical analysis to judge or test the design. Scientific, rhetorical or aesthetic principles may be called on to inspire, refine and finish a design, but creative things do not come of applying the principles alone. Without the sketch of a thing or a diagram of a process, scientific facts and laws are of little use to engineers. Science may be the theater, but engineering is the action on the stage.

**76. The writer's main aim in this passage is to ----.**

- A) show how many different types of creativity there are
- B) stress the creative and constructive aspects of an engineer's work
- C) compare and contrast the way poets and painters work
- D) show that literary creativity is superior to the painter's creativity
- E) establish the fact that it is the engineers' scientific knowledge that makes him creative

**77. We understand from the passage that, for the engineer, scientific laws ----.**

- A) only have a role to play after a design has taken some sort of form
- B) are only relevant in details concerning safety
- C) are a constant factor all through the creative process of design
- D) play an important role only when it comes to finalizing certain details
- E) are rarely applicable at any stage in his projects

**78. The point is made in the passage that aesthetic principles ----.**

- A) have no place in an engineer's design
- B) are central to the very best works of art
- C) and creativity are two very different things
- D) cannot be taught or learnt
- E) can infuse life into an ill-conceived poem

**79. It can be inferred from the passage that, once a poet has achieved the basic core of his poem, ----.**

- A) the creative process is complete
- B) he tends to lose interest in it
- C) he should wait a while before transcribing it onto a blank sheet of paper
- D) aesthetic principles may help him to intensify and complete it
- E) he must start to examine it for flaws and then remove them

**80. According to the writer of the passage, each act of creativity ----.**

- A) necessitates the crossing of frontiers and entry into unknown regions
- B) is dependent upon a storehouse of closely related knowledge
- C) arises almost equally out of thought and inspiration and knowledge
- D) has some bearing on other acts of creativity
- E) in one sphere of endeavour has its counterpart in another

**81. – 85. soruları aşağıdaki parçaya göre cevaplayınız.**

Just as every teenager thinks he is brighter than his parents, every decade considers itself superior to the one that came before. Over the past few months, we of the 2000 decade have made it quite clear that we are morally heads above those who lived in the 1990s. We've done it first by establishing a reigning cliché for that period. Just as the 1960s are known for student unrest, the 1980s for Reagan, Thatcher and the Yuppies, the 1990s will henceforth be known as the second Gilded Age. They will be known as the age when the real problems in the world were ignored while the illusions of the dotcom types were celebrated. It was the age of effortless abundance, cell phones on every ear, stock markets that only went up and Mercedes sport utility vehicles. Never before had business leaders enjoyed so much prestige, and never before had capitalism had fewer mortal enemies. Bill Gates couldn't be on enough business-magazine covers; tycoons like him felt free to assume the role of global sages, writing books with such weighty titles as "The Road Ahead."

**81. According to the passage, the decade of the 1990s was characterized by ----.**

- A) capitalism, blindness and possessions
- B) hard-work, greed and the need to communicate
- C) indifference, immorality and selfishness
- D) generosity, spontaneity and individuality
- E) disagreements, competition and prejudice

**82. In the opinion of the author of the passage, the 2000 decade ----.**

- A) differs very little from the decade of Reagan, Thatcher and the Yuppies
- B) inherited a failing global economy from the previous decade
- C) is far more moral than the preceding one
- D) still admires the values of the business leaders of the 1990s and the books they wrote
- E) is fast losing its idealism and growing more and more like previous decades

**83. The term "Gilded Age" as it is used in the passage means ----.**

- A) to be admired
- B) golden age
- C) with moral principles
- D) with surface shine
- E) in bad taste

**84. We understand from the passage that, during the 1990s, ----.**

- A) there was a great deal of student unrest
- B) capitalism again fell into disrepute
- C) technological advance took the form of useful gadgets
- D) teenagers grew very critical of their parents
- E) business tycoons received undue respect and were indeed almost idolized

**85. One point made in the passage is that ----.**

- A) with each passing decade life gets easier and more comfortable
- B) any hopes of the 2000 decade are not likely to survive the decade
- C) the business magazines of this decade differ very little from those of earlier decades
- D) each new decade regards itself as superior to the previous one
- E) the real problems of each decade are essentially the same

BBC4, a comparatively new TV channel, has a character of its own. From the start it aimed to be “a place to think”, and it was always designed as something “that the commercial market would never do”, says Roly Keating, its controller and formerly head of arts at the BBC. Its first week’s schedule indeed verged on a parody of non-commercial TV, with township opera from South Africa and a performance by a Senegalese singer in a London church hall. A top-rated show will typically draw some 50,000 viewers – almost negligible in television terms. Yet that narrow appeal makes BBC4 a model of what a publicly financed broadcaster ought to do. It has roamed into territory where its ratings-driven sister channel, BBC1, seldom dares to tread. Despite a tiny 35m budget, it boasts an intelligent prime-time talk show and a world news programme so internationally minded that its London provenance is barely visible. BBC4 may wear its gravity a little too heavily at times, but it supplies a variety and thoughtfulness unavailable on prime time BBC1. The more the other BBC channels chase the ratings, and the more that BBC4 refuses to be dictated to by them, the more the channel looks like a model for what BBC television could look like.

86. It is clear from the passage that, since BBC4 is publicly financed, it ----.

- A) has to give viewers the kind of programmes they want
- B) has a large budget with which to work
- C) is under no pressure to attract large numbers of viewers
- D) is under an obligation to offer a great variety of programme
- E) is often severely criticized for the subjectivity of its news programmes

87. In the passage, BBC1 is described as being “ratings-driven”; this means ----.

- A) it is obliged to put on popular programmes
- B) its appeal is a very narrow one
- C) it sees BBC4 as its greatest rival
- D) it feels very secure and can take risks
- E) it never experiments or tries out a new type of programme

88. Before he took over the running of BBC4, Roly Keating ----.

- A) was involved in commercial TV enterprises
- B) was criticized because his programmes were too intellectual and too serious
- C) was a severe critic of the BBC1 channel
- D) had taken a firm stand against the trend to let ratings dictate programming
- E) was arts director at the BBC

89. According to the passage, the programmes BBC4 has to offer ----.

- A) rarely come up to expectations
- B) are varied, unusual and thought-provoking
- C) are mostly news programmes and London-orientated
- D) are attracting very large numbers of viewers
- E) constitute a close rival for BBC1 as regards ratings

90. It is clear that the writer of the passage ----.

- A) feels BBC4 has not lived up to its aim to be “a place to think”
- B) regards BBC4’s budget of £35m as excessive
- C) would like to see the BBC1 channel closed down
- D) is very impressed by the performance of the BBC4 channel
- E) was full of admiration for BBC4’s choice of programme for the first week

The natives of the Lewis Island know wind – sometimes too well. Every winter the Atlantic gales come blasting across the northern tip of Scotland's Outer Hebrides. The wind hardly slows down even after striking land; in the island's marshy interior, gusts regularly exceed 160kph. Everyone stays indoors but the sheep. Tourists arrive in summer, lured by mild temperatures and unspoiled countryside; even so, there's rarely a calm day. "The weather here is changeable", says Nigel Scott, spokesman for the local government. "But the wind is constant". The brutal climate could finally be Lewis's salvation. The place has been growing poorer and more desolate for generations, as young people seek sunnier prospects elsewhere. But now the energy industry has discovered the storm-swept island. The multinationals AMEC and British Energy are talking about plans to erect some 300 outsize wind turbines across a few thousand hectares of moorland. If the 500 million-pound project goes through, the array will be Europe's largest wind farm, capable of churning out roughly 1 per cent of Britain's total electrical needs – and generating some badly needed jobs and cash for the people of Lewis.

**91. We understand from the passage that, in summer, the island of Lewis ----.**

- A) attracts visitors as nature there has remained unspoiled
- B) enjoys a warm, wind-free climate
- C) is one of the most attractive of the islands that make up the Outer Hebrides
- D) has little to offer its inhabitants by way of a living other than fishing
- E) can offer its inhabitants even less in the way of a livelihood than it can in the winter

**92. It's clear from the passage that for a long time now the young people of Lewis ----.**

- A) have been looking forward to the establishment of a wind farm on their island
- B) have been leaving the island intent on finding a better way of life elsewhere
- C) have realized that the island's most valuable asset is its climate
- D) have been reluctant to leave the island on a permanent basis
- E) feel no sympathy for the old traditions and ways of life of the island

**93. According to the passage, Lewis Island ----.**

- A) has the climate and conditions favourable to agriculture
- B) suffers more than any other island in Scotland's Outer Hebrides from Atlantic gales
- C) will undergo many important changes unless a wind farm is established there
- D) may one day be home to Europe's largest wind farm
- E) has an aging population that regards the wind-farm scheme with distrust

**94. If the energy industry carries out the project described in the passage and sets up 300 wind turbines on Lewis, ----.**

- A) maintenance costs due to the gale force winds could cause financial failure
- B) the young people will want to leave their much loved island
- C) there will be a shortage of land for the sheep to graze on
- D) other windswept coastlines throughout Europe will probably follow suit
- E) these will provide Britain with roughly of 1 per cent of her total electrical needs

**95. According to the passage, if the proposed wind farm is set up on Lewis, ----.**

- A) this could make the island unattractive to summer visitors
- B) the idea could spread rapidly to neighbouring islands
- C) this will open up much needed employment opportunities for the islanders
- D) it will only function efficiently in the winter months
- E) the costs will be shared equally by AMEC and British Energy

In this century, the wealth and success of nations will depend like never before on the ability to produce and use knowledge. Universities have long been instrumental in generating knowledge and ideas. But in an increasingly globalized world, and in the face of rapid scientific change, they will need to think about a set of new challenges and how best to prepare their students for the coming decades. Universities will need to teach a new kind of literacy, in which global awareness will play an important role. They also need to deal with the dilemmas posed by the accelerating pace of change brought on by scientific and technological advances. We are on the brink of once-in-human-history progress in combating disease through the application of modern science. Doctors will have at their disposal blood tests that will tell you with substantial predictive power how long you will live and from what diseases you are likely to suffer. The Internet and the application of information technology may well represent the most profound change in the way knowledge is disseminated since the printing press. We are close to understanding the first second of the history of the cosmos.

**96. According to the passage, universities are under an obligation to ensure that their students ----.**

- A) have the chance to work alongside foreign students
- B) are equipped to deal with the changing conditions of the coming decades
- C) are introduced to international perspectives in every area of study
- D) are taught not specific facts as much as broad ways of thinking
- E) all have a good grounding in science and technology

**97. One point that is given considerable emphasis in the passage is ----.**

- A) the need of all students to get acquainted with foreign cultures and global issues
- B) that the universities have a commitment to the pursuit of truth for its own sake
- C) that the universities are in a position to further greater global integration
- D) the incredible speed with which knowledge is increasing
- E) that universities must stick to the values that have made them successful in the past

**98. It is clear from the passage that science and the application of science ----.**

- A) will not help to further global awareness
- B) is largely confined within the universities
- C) has grown so complex that it is beyond the understanding of all but a very few
- D) cannot go on advancing at this rate
- E) is opening up startling new possibilities

**99. The writer of the passage seems convinced that the current rapid developments in science and technology ----.**

- A) will be accompanied by new problems
- B) cannot go on much longer
- C) will bring more harm than good
- D) are largely concentrated in the field of medicine
- E) are beyond the grasp of most people in most countries

**100. The phrase, "once-in-human-history progress" is saying ----.**

- A) we cannot expect or, indeed, hope for such progress ever to happen again
- B) this is only the first of many spurts of progress
- C) this is the first instance of a widespread application of science
- D) there has never been such progress ever before and there may not be again
- E) this is the highest possible peak of progress
