Bilim ve teknolojide yaşanan hızlı değişim, bireyin ve toplumun değişen ihtiyaçları, öğrenme öğretme teori ve yaklaşımlarındaki yenilik ve gelişmeler bireylerden beklenen rolleri de doğrudan etkilemiştir. Günümüzde bilgiyi üreten, günlük hayatında kullanabilen, problem çözebilen, eleştirel düşünen, girişimci, kararlı, iletişim becerilerine sahip, empati yapabilen vb. niteliklerdeki bireylerin yetiştirilmesi hedeflenmektedir. Anlaşılacağı üzere bireyden yalnızca bilgi sahibi olması değil, belli becerileri kazanması ve bu becerileri hayatının her alanında kullanması beklenmektedir.

Çağımızın becerilerinin öğrenciler tarafından benimsenmesi, içselleştirilmesi ve yaşama aktarılması için beceri temelli uygulamalara yer veren öğrenme süreçlerine ihtiyaç duyulmaktadır. Bu nedenle öğrencilere bilgi edinmenin yanı sıra bilgiyi beceriye dönüştürmelerini sağlayacak faaliyetler planlanmalıdır. Bu amaçla hazırlanan etkinlik kitabında öğretim programındaki kazanımlar doğrultusunda belirlenen bilgi ve becerilerin öğrencilere bütünleşik bir biçimde kazandırılması hedeflenmektedir. Bu hedef doğrultusunda konu içeriğine uygun beceri kazandırmaya yönelik etkinlikler tasarlanmıştır. Beceri kazanma süreci karmaşık olduğundan öğrencilerin becerileri yeni durumlara aktararak sürekli kullanmasını sağlamak amacıyla aynı becerinin farklı durumlarda kullanımını içeren farklı konu içeriğine sahip etkinliklere yer verilmiştir. Etkinlikler basitten karmaşığa olacak şekilde sıralanmıştır.

Etkinlik kitabında yer alan etkinliklerin bazılarının bireysel, bazılarının grupla yapılması bazı etkinliklerinin iş birliğine dayalı olması, bazı etkinliklerde teknolojinin ön plana çıkarılması öğrencilerde farklı becerilerin geliştirilmesini sağlayacaktır. Etkinliklerin genellikle farklı kategoride farklı becerileri geliştirmeye uygun hazırlanmasının yanında çoğu etkinlikte günlük hayatla ilişki kurulmasına ve öğrencilerde ilgi uyandıracak düzeyde olmasına dikkat edilmiştir. Ayrıca kalıcı ve anlamlı öğrenmeyi sağlamak için etkinliklerde öğrencilerin sürece aktif katılması, sorumluluk alması da beklenmektedir.

Etkinliklerin öğrencilerimiz için yararlı olması dileğiyle...

Dear Anna.

Greetings from New Zealand! I'm finally here and this country is amazing. The weather is super nice. It's really interesting because it's December and it is summer here.

I have two weeks to explore this country. The nature is wonderful. This week, I will see the Pollard Park. It's a very famous park which has many different gardens in it. Next week, I will explore the city life. I will start with the Bleinheim Palace. I'm very excited. Wish you were here!

Tim lives on Rose Street. It's a small street with a few houses. All of the houses are big and detached with three bedrooms and big balconies. Tim's neighbors are friendly and helpful. Mike and Ted are his best friends. They live next door to him. At the end of the street, there are two shops: a bakery and a butcher's. Tim's mom and dad live round the corner near the post office where there are many shops. Two of Tim's friends, Robert and Jane, live across the street from Tim's parents on Oxford Street. When Tim goes to the post office, he leaves his dirty clothes to his parents and his mum washes them for him. Tim likes the location of his house very much because it's not far away from his workplace. He walks to work with Mike to Queens Street and it takes only 10 minutes. Hi, Jen,

Greetings from Vienna. Finally, I've settled in my small flat. This is my third week here. After the quiet life in Devon, life in Vienna is very lively, and I think I'm getting used to it. Here is a photo of my new neighborhood from my balcony. Let me tell you a little bit about it. Here is one of the most crowded districts of Vienna, and I live in Graben Street. It is quite a long and well-known street for shopping. I can see the beginning of the street from my balcony. It is full of cafes, restaurants and famous shopping brands. Our favorite clothing brand

ZZSA has a huge store in the middle of the street, and I visit there almost every day. There is a famous restaurant next to it and they make the best Wienerschnitzel in the city. You should definitely try it when you come to visit me. Also, there is a big opera house at the end of the street. It is half an hour walking distance from my home. I usually go and watch concerts there on Sundays. That's all for now. I hope all is well with you.

- As its history dates back to ancient times, Rome has many historical wonders. It is one of the most touristattracting cities in the world with more than 7 million visitors annually. Rome has nearly 3 million residents, and it covers an area of 1285 km². Because the city is in the Mediterranean climatic zone, summers can be really hot and dry. The average temperature is 15 °C.
- Berlin is the largest city of Germany by both in area and population. It is home to approximately 4 million people and it covers an area of nearly 891.8 km². The weather conditions are unpredictable in the city, and the average yearly temperature is 9.1 °C. VACATION with MOM

With stars' performance from Anna Christopher as Mary, Jodie Hawn as Mary's mother and Roger Melany as Johny Minton, this movie is worth seeing for a nice, fun time. Mary and her mother are part of an adventure because of some problems on their vacation. It's a good chance for a criticism on personal relationships. See the movie, think and laugh.

DUNKIRK

It is based on a true evacuation story in Dunkirk, a seaside French town, during World War II. The enemy forces are nearby, and death is close to a group of Allied Army troops from Britain, Belgium and France. They are desperate and cut off. It's time for freedom or death. The only hope is a successful evacuation. There is a lot of action, excitement and sentiment. It's a nice thriller. It's a probable award winner and box office success with the great plot and cast. It's worth seeing.

HESITANT

As a fan of Densel Ford, I must say that this is a fantastic movie. It's about the adventures and a secret discovery of a fireman in New York City Fire Department. If sci-fi is your thing, you can't miss it.

1.	James wants to be a scientist. He is fond of technology and fiction movies.
2.	Erin is an adventurous person. She is interested in action movies with war stories
3.	Sophia is a cheerful teeenager. She likes movies with social messages.

- c. he gives the right answers to all the questions

Slumdog Millionaire is the 2009 Oscar-winning movie including Best Picture and Best Director. Danny Boyle's 2008
British drama takes place in India with a largely unknown cast. The film is about the life of a poor Indian orphan Jamal
Malik, a winner of the Indian version of a worldwide famous TV quiz show Who Wants to Be a Millionaire? Jamal
grows up with his elder brother in the street and cannot finish school, but he does everything to survive. When he
comes to the show, (1) The quiz show host doesn't believe
that Jamal is honest because even doctors, professors, and other well-educated people cannot answer half of the
questions. But the boy from a very poor district of Mumbai manages it successfully. So the local police inspector
arrests him to find out whether Jamal is a cheater, a lucky person or a genius. During the examination, Jamal says
his life keeps all the answers to the show's questions. In this fascinating movie, one can easily understand that the
way people see each other does not reflect the reality. People make comments about others, just looking at their
appearance, social status or behavior. However, (2) People
don't know anything about the other side of it. Jamal Malik is a poor teenager, so people see him as a thief, cheater,
and a liar. Although the police officers cannot find anything to prove that Jamal cheats on the show, they still don't
believe that he answers all the questions honestly. The reason is quite simple, an orphan from the slums cannot be
Mr. Know It All. But it happens and (3) The fight for survival
can teach people a lot of lessons in life. Even an orphan from the slums may be the winner, and become a millionaire
without cheating.

CAPTAIN FANTASTIC

Captain Fantastic, written and directed by Matt Ross, is a 2016 American comedy-drama. It tells about an unusual father and his six children who live in the wild in the Pacific Northwest. Ben, the father, teaches his kids how to hunt and survive in the wild. They spend their time climbing mountains, running in the forest and reading books. The kids live with their father because their mother is sick and stays in a hospital. Captain Fantastic is a movie with creativity, originality, and hope. I think this is a movie for every generation. The message of the film is that knowledge

and relationships are more important than material things. It's a tragic story with humor and storytelling is great. You shouldn't miss this amazing movie. I give 5 out of 5 stars.

SPIDER-MAN: INTO the SPIDER-VERSE

Spider-Verse is one of the greatest movies of 2018. It's a funny, original, action-packed animated Marvel adventure. It tells about a Brooklyn teen, Miles Morales who becomes the new Spider-Man. While Miles is

doing graffiti with his uncle at a train station, a radioactive spider bites him and he gains Spider Man's powers. It's a gorgeous superhero film with a great story and characters. I'm a real fan of animated movies, and the animation here is really great. There's a great sense of humor. It's

a wonderful family movie, I suppose. Both adults and kids will enjoy the funny and heartwarming moments. It's really worth seeing even if you aren't a fan of Spider-Man movies. I am sure it's the best superhero movie of the year.

LIFE OF P

Life of Pi is a 2012 adventure-drama film based on the novel of the same name. Taiwanese director, Ang Lee has two Academy Awards for Best Director. He says Life of Pi is not a fantasy movie, it's a drama. It's an emotional story of survival. Tragedy begins when a terrible storm sinks the ship. Pi is the survivor, but he's not alone. Indian man, Pi tries to survive with a Bengal tiger on a lifeboat. A boy, a tiger and a boat. These are the main elements of the movie. Pi and the tiger must learn to trust each other or they won't survive. Although the visuals are breathtaking, the

first part is really boring. It has no dialog at all. If you want to understand the movie, you should read the novel first. I'm sorry, but I don't recommend this movie. I think it's too sad, tragic and a bit boring.

Students will be able to identify specific information in a simple written material such as short newspaper articles on
effects of natural events.

24 Read the causes and effects of natural disasters below. Match them with the correct pictures.

In this country, there are a lot of drylands. When it rains a lot, a large amount of water flows everywhere and damages the lands and houses.

There are deserts in this continent because it doesn't rain enough. There is a shortage of water and people can't grow crops on the drylands.

This city is surrounded by mountains. Because of erosion and heavy rains, the soil and rocks slide from the mountains and cliffs. It gives harm to fields and houses here.

We can see that type of disaster in this region quite often. Low rainfall, lightning and human activities may cause it. It destroys a large amount of area in a short time and kills animals and plants.

25 Read the article below and answer the questions.

IS IT TOO LATE?

Natural disasters are becoming more and more common in the world because of global warming. We experience more floods, wildfires, landslides, drought and famine. Every year natural disasters kill about 90,000 people and affect 160 million people around the world. When we harm the environment, we face wildfires, floods and landslides followed by drought. As a result, we lose plenty of fertile lands and we can't grow enough crops. The lack of food and clean water causes famine and immigration. Millions of people have to leave their homes to find a better place to live in. These disasters also destroy the habitats of many animals. Unfortunately, some animals even become extinct during wildfires. All the countries should be aware of the causes of these disasters and must work cooperatively to stop harming the world. Tomorrow might be too late to save the planet.

- Why do we face more natural disasters now?
 What types of disasters happen when we destroy nature?

Great to hear that we will have an opening ceremony at the university soon! They are planning to invite Robert De Niro or Leonardo DiCaprio for the ceremony. It is hard to guess which of them will accept the invitation. In my opinion, I would prefer Robert De Niro to visit our university because he is more inspirational. He is a more experienced person as he is older. I think we can learn more from him, and he is a great actor! Most of my friends agree with me. Do you agree or have anything to say about this?

Tom	Yes, three times. I really like the city. You will definitely have a great time there.
Harry	What about the hotels? Do you have anything to say about the hotels in Madrid?
Tom	I think it can be a bit expensive to stay at a hotel. So, I wouldn't recommend that.
Harry	What should I do, then?
Tom	Well, you can rent a flat and pay less. It can also be more comfortable.
Harry	I agree with you. I will search for a place on the Internet. It's cheaper, isn't it?
Tom	That's true.
Harry	That's great. I want to ask you one more thing. They say eating out is very expensive in Spain. What do you think?
Tom	That's not true. You can eat at local restaurants and spend very little money. Also, you can enjoy delicious local food.

That's for sure. It's the same everywhere. That's exactly how I feel about Spanish food. I'm just worried Harry

if my wife doesn't like it.

Dr Crimson	Thank you. Good evening everyone.
Presenter	Our listeners are extremely interested in personality tests, so can I ask a few questions about these
	tests before we start talking about your current research?
Dr Crimson	Yes, certainly.
Presenter	
Dr Crimson	Well, psychometrics is the measurement of intelligence and personal qualities. It measures
	basically knowledge, abilities, attitudes, and personal traits.
Presenter	I see. Are these tests useful? That's what most of our listeners want to know.
Dr Crimson	Good question! They are useful if they have reliability and validity. Let me explain what I mean. When
	you use a 1) reliable test, you get the same results each time. If the test is 2) valid, it measures what
	it is supposed to measure and not something else.
Presenter	OK
Dr Crimson	They tell about your personality type. You can, for example, find out how organised, reliable and
	sociable you are. Most people find questions quite interesting and they seem to enjoy answering

I am Bob Johnson, a 15-year-old boy. There are two important people in my life. One is my literature teacher, Mrs Green and the other is my uncle, David, who is a musician.

Mrs Green is a great speech giver. She is very effective at giving talks because she has a special quality which I call charisma. I think people often misunderstand what charisma is and think of it as a kind of fame, but it is not the same as fame. I believe that it's a kind of magic and is relatively rare. I think charismatic people are basically brilliant communicators. Moreover, they have other qualities such as sensitivity, self-confidence, eloquence and vision just like my beautiful teacher. I always feel happy in my teacher's company.

Uncle David is completely different from my beloved teacher. He avoids being in large crowds and he doesn't like talking much. He is often quiet and cautious. He also has good powers of concentration. He looks into himself a lot and tries to find meaning in himself. I think this is his key while composing those wonderful pieces. "My piano speaks when I can't," he says. I always feel relaxed and comfortable when I hear him playing his piano softly.

Bob is influenced by two people who are really important to him.

He thinks charismatic people are all famous.

To sum up my ideas, these two totally different inspirational characters give shape to my life. Their influence on me has been enormous and I'm sure it will be forever.

Are you a first-time traveler? Do you want to take a trip but don't know where to start? Then, you have more reasons to read this blog. Every week, I introduce you to two amazing destinations. This weeks' destinations are Buenos Aires and Barcelona. Here are some useful tips for you to organize an enjoyable, unforgettable trip. First, try to be specific about the destination. Try to find the most appropriate time for your visit. Also, be aware of the customs and traditions of the city. Keep in mind!

People think that it is the Paris of South America. Buenos Aires has a different climate from that of Turkey. It is relatively mild through the year. The city gets hot and humid in summer. While the coldest seasons are June and July, the warmest seasons are January and February. Therefore, the best time to visit this city is between March and April.

Places you shouldn't miss in Buenos Aires; Wander along the boulevards, ideal for witnessing historic and cultural events. Stay in Palermo. There are lots of places for sightseeing such as Palermo Soho and Palermo Hollywood, where all the film companies have their studios. Take time to visit La Boca. It is a small town. It is famous for talented footballers. It is also known

as the town of tango. Head to Villa Crespo to buy high quality leather goods as souvenirs for your friends, family, etc. In Buenos Aires, people see them as the best gifts. Try Asado! It is one of the most delicious foods in this city.

B arcelona, Spain; This Mediterranean city of Spain is one of the richest centers in details, architecture, and traces of history. There are some 'must see' places such as The Font Mágica Fountain and Barrio Gotico. As the hottest month is August and the coldest one is January, the best time to visit the city is from May to June because the actual summertime is sticky with humidity. October, the wettest month, is the best time for rain romantics to visit the city.

When in Barcelona, remember to:

- Admire the great views of the city from the magical Montjuic.
- Visit the Park Guell by Gaudi, a Unesco World Heritage Site.
- Fill up your stomach on Tapas and Pintxos.
- Purchase espardenyes, traditional shoes, as souvenirs.

TASTING CULTURES

Hi, I'm Nisha from India. I'm an exchange student at the University of Iceland. It's a great experience for me to study in a different country. Iceland is very interesting, especially its cuisine. The Icelanders always make a very healthy start early in the morning. Due to the harsh weather conditions of the island, people prefer nutritious food. Their breakfast is rich with dairy products. Skyr is very popular here. It's like yoghurt made from milk. They usually have it with berries. Seafood and lamb are the most favorite dishes for lunch and dinner. My favorite one is the traditional Kjotsupa. It is a delicious lamb soup. They cook lamb with potatoes, carrots, rice, and herbs. As the country is surrounded by the ocean, one can find every kind of fish easily. I don't recommend the Hakarl, though. It's made from shark and it doesn't taste really good. Dinner is the most important meal of the day. The whole family gets together and enjoys it. Before eating the last piece of food, they always ask everyone who is sitting around the table whether they want it or not, which is really polite. Salads are rare here because the country has so many days without sun, and it's really hard to grow green vegetables. There are two things in Iceland that people never say no. They are ice cream and coffee. They love ice cream and eat it at any time of the year, and they drink coffee like there is no tomorrow. I, as an Indian, sometimes miss my country's spicy food because spice means everything to us. We don't only use them just for the taste and aroma but also for their health benefits. We use various kinds of spices in every dish. Chicken tikka masala is a very good example of this. It's a delicious grilled chicken, and we serve it with a tomatoyoghurt sauce spiced with chili, garlic, and ginger. What I always miss here is our bread Chapati and Roti. Bread is an important part of our daily lives. We eat them for breakfast, lunch, and dinner. They also help us to pick the food such as curry and rice with our fingers while eating. Most of the Indians prefer to eat with fingers, and we use our right hand for eating because using the left hand is considered very rude in my country. We also wash our hands before and after the meal.

Read the text about Prague and Cape Town and fill in the table with the correct information.

A TALE OF TWO CITIES

PRAGUE: THE GOLDEN CITY

Prague is the capital of the Czech Republic in central Europe. It's called the golden city of hundred spires because of its beautiful cathedrals and towers. Its rich history, magnificent architecture and breathtaking nature make it a popular tourist destination. The city has warm summers and cold winters. The best times to visit the city are the spring and early fall. Prague is just like a 3D architecture book. You can see many styles of culture from Gothic to Cubist in the city. The most famous historic building is the Prague Castle. It's the symbol of the city. The Powder Gate, the Prague Astronomical Clock Tower, and numerous lovely bridges on the Vlatava River are worth seeing.

You can also take nice pictures of the city from Petrin Lookout Tower. The most interesting building in the city is the Dancing House. Prague is a musical city. It can satisfy both classical music listeners and fans of rock, pop, and every other genre. In summers, the parks and the squares of the city come alive with the music festivals. While walking in the streets of the old town, you can also taste their famous sweet snack, the chimney cake, locally known as Trdelnik. Don't forget to buy a handmade puppet because puppetry isn't a child game here. You can find plenty of wonderful puppet characters in the city.

CAPE TOWN: THE MOTHER CITY

Cape Town is the oldest and the second-largest city in South Africa. It attracts thousands of people with its natural beauty, nice weather, and friendly people. The mild weather of the city all year round makes it a perfect destination, especially for the beach lovers. The best time for a beach holiday is from December to February. Cape Town is home to Africa's most beautiful beaches. The city is the meeting point of two oceans; the Atlantic and the Indian Ocean. The Clifton Beach with its white sand and crystal clear water offers a lot to the visitors. You can also go to Boulders Beach and have a lifetime experience with the friendly penguins. Table Mountain is the most

famous landmark in Cape Town. The top of it has a flat shape, and it's considered to be one of the Seven Natural Wonders of the World. You can reach the top by cable car. Kirstenbosch National Botanical garden is one of the world's greatest botanical kingdoms. It holds an incredible range of plant species. In summer, local people enjoy concerts from rock to classical at the garden's amphitheatre. This city is the right place to buy leather. The local leather backpack can be a great choice, and Zulu ceremonial spoons can be a perfect souvenir to bring home.

Seven Wonders of the Monumental Engineering of the 20th Century

The American Society of Civil Engineers came up with the list of the seven wonders of monumental engineering and constructions of the 20th century. The list is as follows:

Golden Gate Bridge: It connected San Francisco and Marine County in 1937. It was the longest suspension

bridge in the world until 1964. It took about four years to complete this beautiful bridge with a length of 2.73 kilometers. 80.000 miles worth of steel wire held the bridge

and the engineers designed special cables, 36.5 inches in diameter. to link the two towers.

Empire State Building: This masterpiece is still the

tallest building in New York. It is 381 m high. It was also the tallest building of the world until the construction of the World Trade Center. The engineers completed

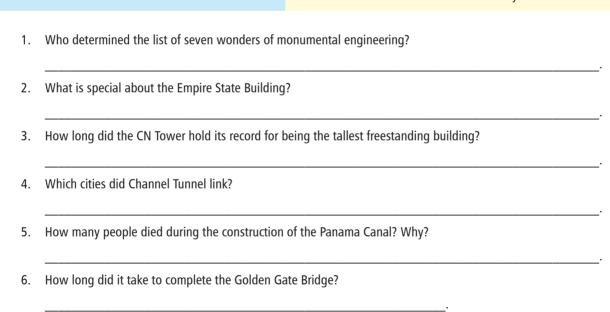

CN Tower: In 1976, the tower became the world's tallest freestanding building with 553.3 m height. It held this record for 34 years until the completion of Burj Khalifa.

Channel Tunnel: This tunnel linked Folkestone (England) with Coquelles (France). The construction of 50.45 kilometer rail tunnel began in 1988 and finished in 1994.

Panama Canal: It took 34 years to create this 50-mile-long canal across the Isthmus of Panama. About 80.000 people died during its construction, most from disease. It was the most expensive and deadliest project in American history at that time.

KYOTO TIMES Two years ago, my friend Lilly and I visited Kyoto, Japan. The first place we visited was Nijo Castle, a World Heritage site of UNESCO. It was an old wooden samurai castle with a beautiful garden. It was a picture-postcard place with all colours of breathtaking flowers everywhere. The main entrance to the castle was Higashi Otemon Gate. As we entered the gate, we were back in the old times of Japan. When we went to Kyoto, it was the cherry blossom season, the most enjoyable time of the year. As it was May, the weather was warm, and there were pink cherry trees everywhere. We walked around the beautiful garden and watched the blossoms. At night, we joined the Cherry Blossom Festival and watched the colourful 3D light shows over the trees. It was just like a dream. The day after the festival, we heard that there was a traditional wedding ceremony in the teahouse of the castle. We saw the bride and the groom in their traditional Japanese wedding dresses. They looked amazing. It was a very special moment in their life. On our journey back to England, we felt so delightful to have such great memories. Jamie Wilson

THE ANCIENT PORT CITY

This is the story of Ephesus, one of the largest and richest cities of the Roman Empire. It had beautiful temples, baths, theatres, and libraries. It was a port city, like İzmir today. Traders from all around the Mediterranean came to this harbour.

The most important building of Ephesus, The Library of Celsus, is one of the most famous Roman buildings today. It has four statues. The statues represent Wisdom, Goodness, Thought, and Knowledge. The library was built in the 2nd century.

There was a beautiful street connecting the harbour to the theatre. The street had shops on both sides. It had lights at night. In the Roman Empire, only Rome, Antioch, and Ephesus had streetlights. This street was built by the emperor Arcadius in the 5th century.

After the 6th century, the mud that the Küçük Menderes river carried, filled the harbour slowly. The city became smaller and smaller. In the end, people left the city and started living in the nearby town called Selçuk. Today the sea is eight kilometres away from the ancient harbour of Ephesus.

In the 19th century, Turkish and Austrian archaeologists started to restore the buildings in the ruins of Ephesus. For example, the Library of Celsus was not like what we see today. They rebuilt it in 1978. Ephesus is one of the most important and complete Roman cities that came through our day.

26 Read the story again and write true (T) or false (F).

- _____ 1. Ephesus was near the sea in the past.
- _____ 2. The Celsus Library had three statues.
- ____ 3. The street was dark at night.
- _____ 4. People left Ephesus and moved to Selçuk.
- _____ 5. German archaeologists restored the buildings.

• Students will be able to find the main idea of a text about health problems/emergency situations that have happened recently.

21

Read the text and write a suitable title for it.

Coronavirus has just caused a new disease called COVID-19. With the outbreak of the disease in China, life in most countries has been locked down. Unfortunately, nobody knows when the disease will disappear. Luckily, the patients have informed the people via social media, so we can learn what to do and what not to do during this pandemic. Here is one of them:

Sarah is a 24-year-old activist. She has just caught the disease. She is still at the hospital, but she's getting better day by day.

She writes on her blog that she has had a high fever, a heavy cough and loss of appetite for a week. Sarah thinks that the virus has seriously affected her system. Even worse, she has had dizziness and she has lost her sense of taste. However, she has started to take the smell of everything and it has been disgusting for her. After receiving the positive test result, she was scared. But now she believes that everything will be better because all the health workers are doing their best to treat the disease. Like all doctors, she warns us that we should wash our hands, stay home and practise social distance because we may have the virus but not show the symptoms.

22 Read the text again and choose the main idea of it.

- a. The condition of some patients may get worse 5-10 days after the symptoms start.
- b. If we are aware of the symptoms of COVID-19 and protect ourselves, we can avoid it.
- c. We mustn't travel abroad or join social gatherings because the disease is quite contagious.

23

Read the experiences of two people and find out the message they give. Then, share your ideas in class.

I've just had a terrible experience at home. I was with my little daughter. She was playing in her room, at least I was thinking so, and I was in the kitchen. Suddenly, I heard a noise like a splash of water. I ran to the bathroom and saw her lying in the bathtub. I took her out, but she was unconscious. I ran out of the house to ask for help. Luckily, our doctor neighbor was at home and she gave the first aid until the ambulance arrived. This saved my baby's life.

I've had an accident recently. Last week, while I was riding my bike, a car hit me. I fell off my bike and felt a terrible pain. Everybody around tried to help me, but they didn't know what to do. At last, somebody thought of calling the emergency and an ambulance arrived to take me to the hospital. I was lucky that nobody touched me until I got professional help.

Read the text and decide whether the statements are TRUE or FALSE.

The Internet provides different ways of communication for people. They are social media, e-mail services, video calls and instant messaging. They are all useful ways to develop friendships with people around the world, learn about other cultures and much more.

People prefer sending e-mails instead of writing letters as it is faster. However, sending e-mails isn't practical enough because you may not know if the person you want to send an e-mail is online at that moment. Moreover, making phone calls and video calls may not be possible any time you want because the

person you want to call may not be suitable to talk. That's why instant messaging has become more popular than sending e-mails or making phone calls. It is like text messaging on mobile phones, but quicker, more functional and with no charge, absolutely free. Instant messaging programs let users see if their friends and contacts are online and communicate with them in real time. Most of them also enable file sharing, sending and viewing videos, chatting online and using the Internet instead of a phone to talk with friends. Therefore, instant messaging programs are getting more popular day by day.

1	The Internet provides people only with instant messaging.	
2	The most popular way of communication through the Internet is sending e-mails.	
3	When you send an e-mail, you may not know if the receiver is online at that moment.	
4	Instant messaging has become more popular than email or phone.

Hi, guys! Are you staying home because of quarantines? Three months ago, COVID-19 was thousands of miles away from my life. Two months ago, I started to hear some murmurings which I didn't care much. March sisters. 'Christmas won't be Christmas without any presents.' That's the first sentence of Little

Women.

Dennis Oh, my God. I think you know every detail in the book, and you should watch the movie as soon as

possible directed by Greta Gerwig. Some critics say the movie is more amazing than the book.

April Perfect news. Let's watch it together tomorrow afternoon.

Dennis That would be great. Can you give me some clues about the characters of March sisters?

April Well, the oldest Meg is so theatrical. She loves acting. She's also responsible and kind. Jo is the

Milosz Jasko is a successful singer. He comes from Lublin, Poland. He plays with a band with three other members. He usually gives concerts all around the world, so he travels a lot. Summers are often busier than winters for him and he rarely travels back to Poland to visit his family. In winters he feels more relaxed and tries to spend time in his small town. This season is extraordinary for him and his band because people stay at home during the coronavirus outbreak and he generally gives online concerts via his social media account. So, nowadays his life is more simple than usual. I admire him because his music is soft and he can adapt to change easily.

A research by an American psychologist shows that the maximum number of friendships that an average person can maintain in real world is about 130. But what is that number on social media where the maximum number of friends permitted is 5000? According to social networking statistics, an average social media user has 250 online friends. Younger people have more online friends than older people because older people are more selective in choosing their friends.

However, Mary Haywood from Brighton was an exception. She became one of the oldest social media users at the age of 98 with the username "YoungMary1910". When she reached her 5000-friend limit on a social media platform Mybook, Ms. Haywood joined another social media platform named Photogram and continued her social networking. At the time of her death in April 2012, she had 4980 friends on Mybook and more than 60000 followers on Photogram. Ms. Haywood's last post was on March 6, 2012. Madison Hello everybody! Welcome to Madison's Blunt Show at home edition. I hope everyone is staying home safe and healthy. Today we're going to make a live chat with a very special person, a history professor from the Princeton University, Mr Jonathan Bruckberry. He is in Florence now and he is going to talk about a high- profile issue, the creativity of people in quarantine days. Can you tell us exactly how this happens professor?

Professor Well...yes, we all see that quarantine is bringing out the creativity in many people. It has always been the same for ages. Some people respond to suffering by turning into art, some into music, literature, or an invention.

Madison Definitely. Each day, we see people on social media compose lovely songs, write poems, cook interesting dishes, or furnish their homes...

Professor Did you know that Shakespeare wrote "Macbeth" and "King Lear" in quarantine days? He isolated himself and wrote these famous plays, all in 1606, during the plague. The Norwegian expressionist Edvard Munch, as you know, the artist of the famous painting "The Scream". He painted his self portrait after he survived from the Spanish Flu in 1919. But the most interesting one is the story of how Isaac Newton discovered the Gravity. Let me tell you. Newton was in his early twenties when the Great Plague hit London. It lasted from 1665 to 1666 and killed more than sixty-five thousand people. Newton was a college student at Cambridge in those days. When the Plague broke out, the school sent students home to continue their studies. Young Newton moved to his safe family farmhouse outside the city. At home, he built bookshelves and created a small office for himself. He continued his mathematical problems there. By the end of 1666, Newton invented the mathematical system called calculus. During his studies, he used to watch the apple tree outside his window. One day he saw an apple falling from a tree and it was the starting point of everything. "The force that pulls the apple down must be the same one that pulls the moon to the Earth," he murmured to himself. Six months later, Newton returned to Cambridge with the theories in his hands... (pause) You see, during a pandemic, he had to work from home like most of us and he used the time wisely.

Madison Absolutely amazing and an inspiring quarantine story, thank you for joining us and sharing your knowledge with us professor... What great inventions and beautiful pieces of art will COVID-19 leave behind? Who knows?

(they both laugh together)

TV Host	Good evening ladies and gentlemen. Welcome back to the most watched show with Dennis Woolf on TV. Dr Anish Majahan from UCLA Medical Center is my guest tonight. Thank you for being on my show Dr Majahan. I really appreciate it as we're all having hard times.
Dr Majahan	Very happy to be on your fantastic show. I am sure we'll overcome this disease, and we'll become as free as we have always been.
TV Host	Thank you, Dr My viewers have asked you more than 40 interesting questions about coronavirus. And I'll ask you the top 5. Here's the first one. Is it possible to have the flu and coronavirus at the same time?
Dr Majahan	Yes. You can suffer from the flu and coronavirus at the same time.
TV Host	What do they have in common?
Dr Majahan	Well, they share some common symptoms, such as fever and cough. But many coronavirus patients suffer from shortness of breath, and some people with coronavirus lose their senses of taste and smell.
TV Host	Here is the next question. Can pets spread this coronavirus to people?
Dr Majahan	There's no evidence that domestic animals including pets can spread COVID-19 to people. But it's better to wash your hands before and after any contact with them.
TV Host	This question is still related to the previous one. You know a tiger has tested positive. So, can my pet get coronavirus from me?
Dr Majahan	There are lots of unknown things about this virus, but If you are ill, wear a facemask, don't share food, kiss, or hug your pet.
TV Host	A very interesting one's coming as the third. Should I stop wearing my contact lenses?
Dr Majahan	Yes. Taking a break from contacts can help. Because you touch your eyes multiple times if you are a contact lenses wearer.
TV Host	The fourth question is here. The summer is on the way. Can mosquitos transmit coronavirus?
Dr Majahan	No. There's again no evidence mosquitos can spread the new coronavirus.
TV Host	And the last question. Are some blood types able to fight this virus better than other blood types?
Dr Majahan TV Host	Absolutely no. All of us can get this virus. I mean we haven't had a chance to build immunity yet. Thanks for joining my show Dr Majahan. It's great to learn from you about this unknown and
	unexpected visitor. I hope it'll leave us soon.

The climate in Tokyo is fairly mild, and the average temperature is 16°C. There aren't big changes in temperature throughout the year and that's why the city welcomes millions of tourists in all seasons. The city hosts nearly 4.7 million tourists each year. As its history dates back to ancient times, Rome has many historical wonders. It is one of the most tourist-attracting cities in the world with more than 7 million visitors annually. Rome has nearly 3 million residents, and it covers an area of 1285 km². Because the city is in the Mediterranean climatic zone, summers can be really hot and dry. The average temperature is 15°C.

 Betlin is the largest city of Germany by both in area and population. It is home to approximately 4 million people and it covers an area of nearly 891.8 km². The weather conditions are unpredictable in the city, and the average yearly temperature is 19.1°C. I would like to visit this beautiful city one day because I love ancient cities and I really like to take the pictures of the historic buildings like palaces and churches. Verona is rich in culture so I can have a chance to take <u>stunning</u> photos, especially a selfie at the famous balcony of Romeo and Juliet. The other reason that I'd like to visit this city is to taste its <u>delicious</u> food because Italian cuisine has plenty of mouth-watering dishes and I want to try most of them.
