PREFACE

Dear Students,

In this activity book, there are activities at various levels and structures that will allow you to use the knowledge and skills you have gained during the teaching processes. With these activities, you will have the opportunity to both revise the subjects you have studied at school and monitor your academic progress. The activities in this activity book prepared for this purpose were structured to include cognitive domain steps.

In the activity book, besides gap filling, matching, multiple-choice, open-ended, short-answer item type activities, there are some other activities which allow you to have a pleasant time with content such as crossword, wordsearch puzzles, skill-based activity, structured grid, and fun time activities. Also, in the "Do I remember?" section, you will be able to self-evaluate academically and you will have the opportunity to revise the missing topics through the data matrix.

We aim to contribute to your academic development with this activity book, which has been meticulously prepared by experts in the field. Hope to see the positive reflections of this study in your education life.
